INSULATED SIDING EXCLUSIVELY BY ALCOA HOME EXTERIORS

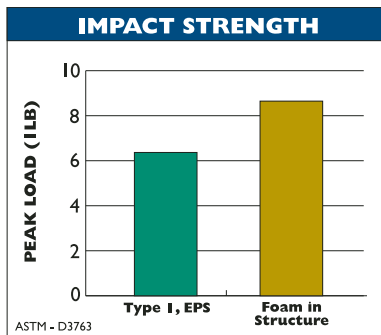

Structure puts together the best insulation and the best siding in the industry for a siding product that far exceeds expectations.

- Alcoa & Dow...the industry-leading product you'd expect from industry leaders
- Withstands 160 mph windload
- Foam backing provides a straighter appearance and a solid feel.
- Design options include Double 6" and Single 7"
- Exceptional woodgrain detail and colors
- Locks securely with patented T3-Lok System

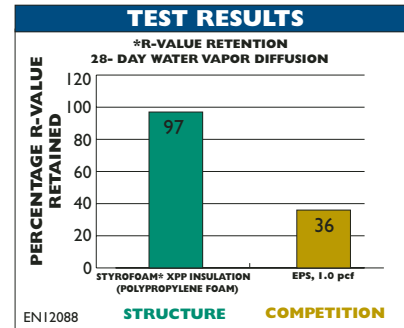

STRUCTURE PERFORMS WHERE OTHER SIDING FAILS.

- The first premium siding permanently bonded with STYROFOAM® insulation
- Insulates entire home exterior... even over wood framing where heat loss is significant
- Can improve the R-Value (resistance to heat flow) of your home up to 25%
- Reduces high frequency noise and wind sounds by up to 50%
- Solid feel and natural woodgrain pattern for the appeal of real wood
- STYROFOAM has up to 30% more impact resistance than EPS foam.

SIMPLY THE BEST WARRANTY PERIOD.

Registered Medallion Lifetime Warranty. You'll get worry-free performance, long-lasting service, and beauty from an industry leader.

THE STRUCTURE OF INSULATION: WATER MEETS ITS MATCH

Nothing can compromise an insulation's effectiveness like moisture. And nothing can compromise moisture like STYROFOAM's unique extruded polypropylene insulation... the real water beater.

- Extremely low moisture absorption compared to other foam-backed siding
- Water absorption can also lead to structural damage in the foam from freeze-thaw cycles
- Retains virtually all of its R-Value* when exposed to moisture, in comparison to EPS foam which retains less than half of its R-Value.
- Helps keep heating and cooling costs down in all climates and conditions, even in the presence of moisture

GELOY® Sun Protection High-performance resin that adds extra UV protection to boost the color's fade resistance.

T3-Lok Design Special locking system that tightens under pressure so panels stay secure and locked together.
